HITRUST®

THE HITRUST ASSESSMENTS

e1 ESSENTIALS 1-YEAR — HITRUST® CERTIFIED

i1 IMPLEMENTED 1-YEAR — HITRUST® CERTIFIED

r2 RISK-BASED 2-YEAR — HITRUST® CERTIFIED

e1 ESSENTIALS - 1 YEAR	i1 IMPLEMENTED - 1 YEAR	r2 RISK-BASED - 2 YEARS
HITRUST e1 assessment is a foundational cybersecurity framework. It is an excellent starting point for organizations to get oriented with the HITRUST CSF framework.	HITRUST i1 assessment is designed for healthcare organizations and business partners who require moderate assurance.	The HITRUST r2 assessment is globally recognized as a high-level validation showing that an enterprise successfully manages risk by meeting and exceeding industry-defined standards for cybersecurity.
Allows carving out service providers from the scope of assessment. It also permits the option to inherit controls from service providers, if you choose to include them in the scope of your assessment.	Allows carving out service providers from the scope of assessment. It also permits the option to inherit controls from service providers, if you choose to include them in the scope of your assessment.	Mandates the inclusion of service providers in the scope of assessment.
44 fixed controls	183 fixed controls	1900+ controls. Additionally, on an average, there are approximately 300 controls included in an r2 assessment.
Annual certification	The i1 certification is a 2-year cycle. In year 2 of the i1 cycle, organizations have three options: Rapid Recertification (60 controls), Expanded Rapid Recertification (60 + 60 controls), or full i1 Certification (183 controls).	2-year cycle
Perfect for organizations with limited information security processes.	Perfect for organizations in the healthcare and health-tech space without a mandate for an r2.	Perfect for organizations that handle a significant amount of PHI data and are required to work with payers, hospitals, state DOH, and other entities.
